

TOBACCO

The Governing Board recognizes that tobacco use presents serious health risks and desires to provide support and assistance in reducing the number of students who begin or continue to use tobacco. The Superintendent or designee shall establish a comprehensive program that includes consistent enforcement of laws prohibiting tobacco possession and use by students, tobacco-use prevention education, and intervention and cessation activities and/or referrals.

Prohibition Against Tobacco Use

Students shall not possess, smoke, or use tobacco, or any product containing tobacco or nicotine, while on campus, while attending school-sponsored activities, or while under the supervision and control of district employees. This prohibition does not include students' possession or use of their own prescription products. Prohibited products include, but are not limited to, cigarettes, cigars, miniature cigars, clove cigarettes, smokeless tobacco, snuff, chew packets, and betel.

Students' possession or use of nicotine delivery devices, such as electronic cigarettes or hookah pens, with or without nicotine content, is also prohibited.

Intervention/Cessation Services

The district may provide or refer students to counseling, intensive education, and other intervention services to assist in the cessation of tobacco use.

Prevention Instruction

The district shall provide developmentally appropriate tobacco-use prevention instruction for students at selected grade levels from K-8. Such instruction shall be aligned with state content standards and the state curriculum framework for health education and with any requirements of state and/or federal grant programs in which the district participates.

Program Planning

The Superintendent or designee shall coordinate with the local health department and county office of education in program planning and implementation. He/she may establish an advisory council including students, parents/guardians, district staff, representatives of the local health department and community organizations, law enforcement professionals, and/or others with demonstrated expertise in tobacco prevention and cessation.

The Superintendent or designee also shall coordinate the district's tobacco-use prevention program with other district efforts to reduce students' use of illegal substances and to promote student wellness.

TOBACCO (continued)

The district's program shall be aligned with guidelines issued by the California Department of Education (CDE) and with federal Principles of Effectiveness described in 20 USC 7115. The Superintendent or designee shall:

1. Base the district's program on a thorough assessment of objective data regarding tobacco-use problems in district schools and the community

This assessment shall include an analysis of data regarding the incidence and consequences of tobacco use, an examination of existing efforts and activities in the community, and a determination of high-priority groups that are most in need of district services.

2. Establish a set of measurable goals and objectives and design the program to meet those goals and objectives
3. Design and implement the program based on scientific research or evaluation that provides evidence that the strategies will prevent or reduce tobacco use
4. Use the results of ongoing program evaluations to strengthen the program and refine program goals and objectives

Program Evaluation

To evaluate the effectiveness of the district's program and ensure accountability, the Superintendent or designee shall biennially administer the California Healthy Kids Survey to students at selected grade levels in order to assess student attitudes toward tobacco and student use of tobacco. He/she also shall annually report to the Board and the CDE on program activities, program expenditures, the number of individuals receiving each type of service or training, progress toward program goals and objectives, and other data required pursuant to Health and Safety Code 104450.
