

HOME AND HOSPITAL INSTRUCTION

A student with a temporary disability which makes school attendance impossible or inadvisable shall receive individual instruction in the student's home or in a hospital or other residential health facility, excluding state hospitals. This instruction applies to students incurring a physical, mental or emotional disability after which they can reasonably be expected to return to regular day classes or an alternative education program without special intervention. It does not apply to students identified as individuals with exceptional needs pursuant to Education Code 56026.

Home or hospital instruction shall be provided only by teachers with valid California teaching credentials who consent to the assignment.

The district shall offer at least one hour of instruction for every day of instruction offered by the district in the regular education program. No student shall be credited with more than five days of attendance per calendar week or credited with more than the total number of calendar days that regular classes are offered by the district in any fiscal year.

Insofar as possible, the teacher providing home or hospital instruction shall consult with the student's current classroom teacher(s) so as to provide a continuity of instruction that enables the student to stay abreast with the regular school program.

The Superintendent or designee may require verification through any reasonable means that the student requires home instruction. In addition, this verification shall also state that the disabling condition will not expose the teacher to a contagious disease that can be transmitted through casual contact. Home or hospital instruction shall not be denied to students with Hepatitis B, herpes or HIV/AIDS, as long as the home or hospital practices current preventive protocol as determined by the U.S. Centers for Disease Control.

Parental Notifications

At the beginning of the school year, the Superintendent or designee shall notify parents/guardians that:

1. Individual instruction is available for temporarily disabled students as prescribed by Education Code 48206.3.
2. If a student becomes temporarily disabled, it is the parent/guardian's responsibility to notify the receiving district of the student's presence in a qualifying hospital.
